# Controlar tiempos

La Técnica Pomodoro es un método para mejorar la administración del tiempo desarrollado por Francesco Cirillo a fines de los años 1980. La técnica usa un reloj para dividir el tiempo dedicado a un trabajo en intervalos de 25 minutos - llamados 'pomodoros'- separados por pausas.

# Subrayar

- **Google Drive: 15 GB almacenamiento gratuito**

The screenshot displays the GoConqr user interface. At the top, there is a navigation bar with a 'CREAR' button, a search bar containing the text 'Busca contenido, personas o grupos', and a user profile for 'Iciar Silvestre'. The main content area is divided into a left sidebar and a main panel. The sidebar contains sections for 'Grupos', 'Asignaturas', and 'Cursos', each with a 'mostrar todo' button and a '+ Crear' option. The main panel features a 'Mira lo Que te Has Perdido' notification with a megaphone icon and a '¡Bienvenido a GoConqr!' message with the GoConqr logo. The welcome message includes instructions on how to use the platform's features like 'Recursos' and 'Grupos Sugeridos'.

# Reglas nemotécnicas

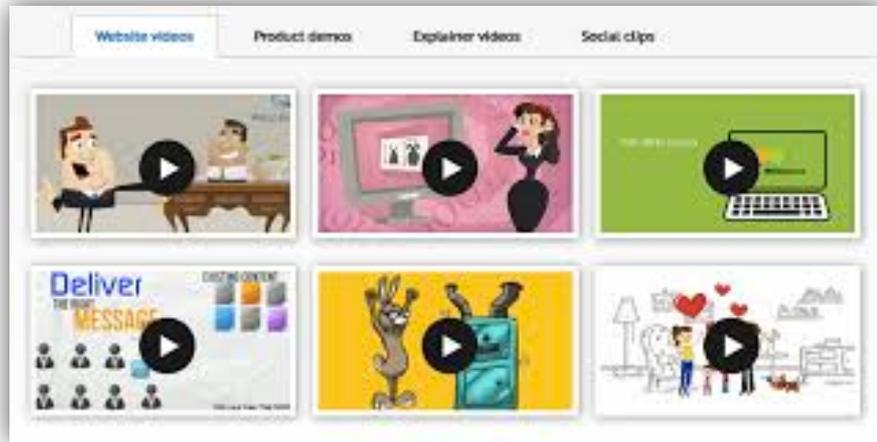

La palabra “Mnemotecnia” deriva del griego mnéemee (memoria), y téchnee (arte). Una regla mnemotécnica es un sistema sencillo utilizado para recordar una secuencia de datos, nombres, números, y en general para recordar listas de datos relacionando palabras, imágenes, etc.

# Matemáticas

The screenshot displays the Algeo Graphing Calculator app interface, which is organized into several sections:

- Trigonometría:** A vertical sidebar on the left containing icons and labels for Geometría, Álgebra, Trigonometría (with  $\sin \alpha$ ), Ecuaciones ( $a^x=c$ ), Geometría analítica, Derivados ( $\lim_{x \rightarrow 0}$ ), Integrales, and Conversión de Unidades.
- Triángulo:** A central panel with a search bar and a list of tools: Calculadora de Formas 2D (with formula  $\frac{b \times h}{2}$ ), Triángulo (with a triangle icon), Circunferencia (with a circle icon), Sector circular (with a sector icon), and Polígono regular (with a polygon icon). Below this is another section for Calculadora de Formas 3D, including Esfera and Cilindro.
- Polígono regular:** A detailed calculator for regular polygons. It features a diagram of a regular polygon with side length  $a$  and radius  $r$ . The area formulas are shown as:
$$A = \frac{a^2 N}{4 \tan\left(\frac{180}{N}\right)}$$
$$A = \frac{r^2 N \sin\left(\frac{360}{N}\right)}{2}$$
The interface includes input fields for "Número de lados (N)" (set to 9) and "Arista (a)" (set to 36). A "Radio (circunradio) (r)" field is also present. A "Calcular" button is located below the inputs. The results section shows "Área (A): 8011.6442". At the bottom, there is a "Doain" logo and a "DOWNLOAD TO DOMINATE" button.
